

## SPECIAL ACCESSORIES and EXPANDED ON BOARD CRUISE KIT

Need more charging amps? The **8** groove Microbelt system known as Serpentine will operate alternators in excess of 250 amps 12v, considerably higher capacity than the original, factory supplied "V" Belt. Our kit includes:

- ✦ replacement 8 groove serpentine crankshaft pulley
- ✦ replacement 8 groove Serpentine water pump pulley
- ✦ 17mm bore 8 groove Serpentine alternator pulley
- ✦ 8 groove Serpentine Belt including mounting hardware and Loctite

**\$675.00**

### Balmar AT-200 Alternator

**For 200 amps 12v the New Balmar AT-200** Alternator is a great choice. This unit has a very impressive performance curve and is particularly well suited to high output at low speeds. (Performance curve attached.) TAD offers the 200 amp alternator as a complete kit with MC614 Smart Regulator, wiring harness and temp alarms for battery & alternator.

**\$1,836.00**

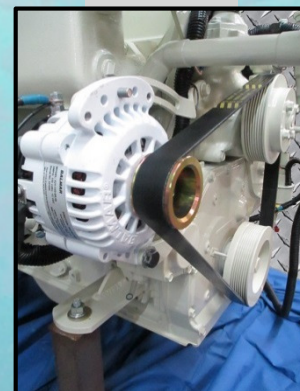

*The Balmar AT series alternators are also available in 165 amps. Call for pricing.*

**For under 200 amps 12v, the more economical Balmar 621 Series** Alternators are well suited. The 621 series kits include MC614 Smart Regulator, wiring harness and temp alarms for battery & alternator. The kits are available in:

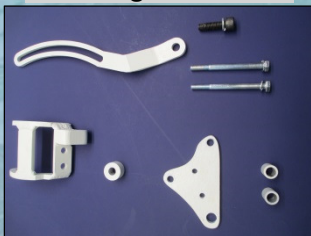

- 70 amps for **\$950.00**,
- 100 amps for **\$1,056.00**,
- 120 amps for **\$1,110.00**,
- 150 amps for **\$1,163.00**.

**Additional 10% Discount off Alternator price** if Belt Kit and Alternator Kit purchased together.

### Balmar 621 Alternator

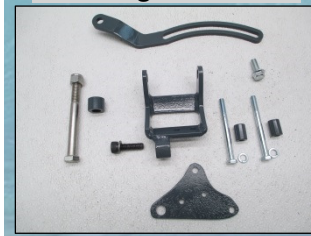

### Balmar 621 Alternator Mounting Bracket Kit

If you are replacing the standard alternator that was supplied with the engine with a 621 or AT series Balmar alternator, you will require a **replacement alternator mounting bracket and hardware kit**. (Please specify 621 or AT) **\$150.00**

*If you already have a 621 Series Balmar alternator fitted to your engine and you simply wish to upgrade your belt system, your existing alternator mounting bracket and arm should work fine.*
